

The Benefits Provided by
Optimized Photonic Systems, Inc.

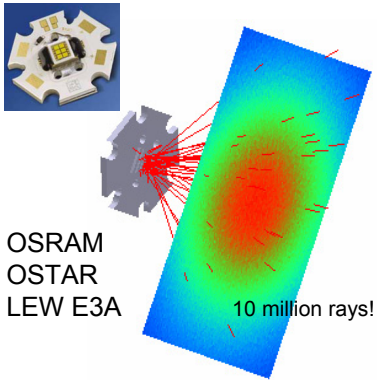

Executive Summary

1. OPS provides optical design and evaluation expertise
 - We utilize the Zemax optical design package
 - Our optical design software works with CAD such as SolidWorks
 - OPS can also develop prototypes to validate designs

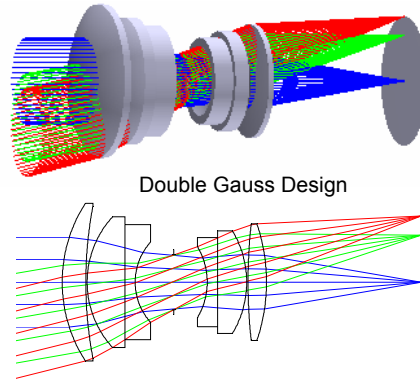

2. OPS can provide marketing support
 - We can illustrate the performance benefits of your optical designs
 - We can generate graphics for your marketing activities
 - OPS can provide competitive performance analyses

3. OPS is experienced and reliable
 - We have over 22 years experience developing optical systems
 - Our experience comes from a fast paced entrepreneurial environment
 - Outstanding customer service is our primary objective

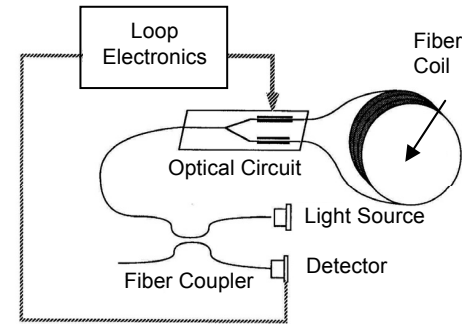

1. OPS Specializes in Optical Design and Evaluation

Lighting and Illumination Systems

Imaging System Design

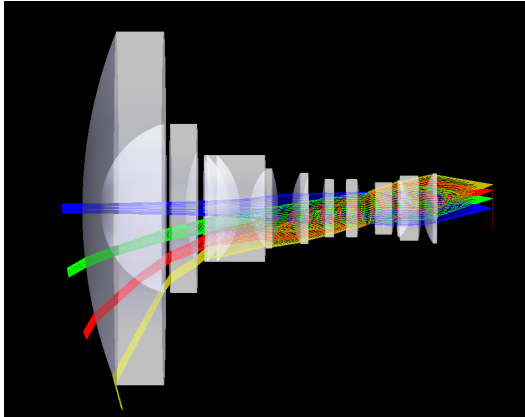

Fiber
Optic
Gyroscope

Fiber and Integrated Optics

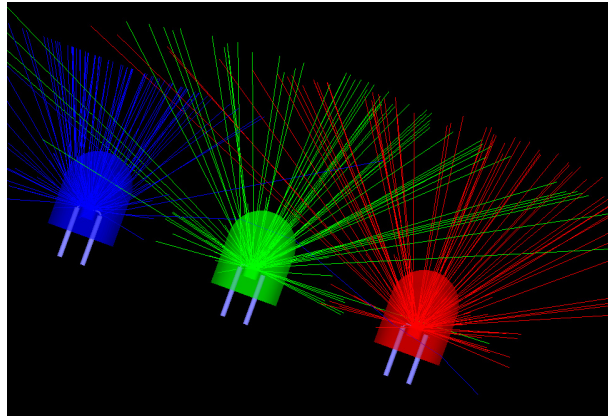

Our Experience Has Included

- LED array backlights for LCD displays
- Design and tolerancing of imaging optics
- High precision fiber optic gyroscopes

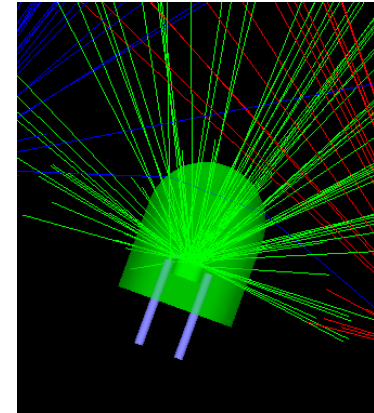

2. OPS Can Support Marketing Efforts.

The function of a compound lens can be quickly seen.

Mixing of LED outputs can be vividly illustrated

Details can be very compelling

- OPS can catalogue and illustrate the performance benefits of your products
- We can provide compelling graphics to support your marketing
- OPS can provide competitive performance analyses

3. What Differentiates OPS?

Focus

- OPS concentrates on optical design and evaluation
- We keep our edge by never losing our edge
- Savings in design time translates to

Cost Effectiveness

- OPS consists of photonic design and simulation experts
- We keep our operating costs very low
- Our services are extremely cost competitive

Customer Service

- OPS feels that personal customer service is the only way to operate
- We partner with our clients closely until the completion of their project
- OPS supports all optical sourcing and fabrication as requested

Optimized Photonic Systems, Inc. looks forward to satisfying your optical design and evaluation needs.

For more information on our photonic design services please visit our website or to discuss your specific concerns please contact us at:
